

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application.

1.- 13. (Canceled)

14. (Original) A system for storing an audio message sent from a communication device through a mobile radiotelephone network, the system comprising:

a subscriber database having a plurality of entries, each entry containing information for one user;

an audio server engine for communicating with the communication device, the audio server engine receiving user information from the communication device and authenticating the user by retrieving an entry having the user's information from the subscriber database;

an audio message management unit for recording the audio message received from the communication device based on instructions from the audio server engine; and

an audio message storage area for storing the audio message.

15. (Original) The system of claim 14 further comprising a user authentication unit.

16. (Original) The system of claim 14 further comprising a feature code validation unit for validating feature codes received from the communication device.

17. (Original) The system of claim 14 wherein the system is connected to a public switched telephone network.

18. (Original) The system of claim 14 wherein the system is connected to a mobile switching center.

19.-23. (Canceled)
